

INTERNATIONAL WEBINAR EVENT

In the framework of academic collaboration

TOPIC OF DISCUSSION

“Prediction of Careers in The World of Information Technology in 2021 and The Strategy for Educators and Students to Deal with it.”

BRIEF

The vast and variety of jobs in the world of Information Technology has been evolved from time to time, and the dependencies of its knowledge has its own speciality and expertise. Many great opportunities for better future graduates from IT study program. A fresh graduate applicant who seeking for a job and already have some skills in IT is way more valuable to the hiring managers and modern jobs compared to the other applicants with common skills.

OBJECTIVES

The topic of discussion from the Webinar will have a good influence to students and lecturers. Students will get the informative and interesting knowledge about the latest technology tools or skills and they will learn how lecturers deliver the lessons from different country.

This EVENT is also a bridge to the participant’s university to be able to get to know each other more closely.
